Subject: Freedom of Information Request

Hello,

I would like to make the following Freedom of Information request for each CCG that you cover:

1. What is the population size covered by your community continence service provider?

2. Please provide a copy of your community provider continence service specification.

3. Does your provide incontinence pads to patients, or do they assess patients and advise which products the patient needs to purchase?

4. If your provider does provide incontinence pads, is there a limit to how many they are

prescribed? If so how many are they allocated?

5. How many weeks supply of pads do patients get at a time?

6. What is the average number of pads prescribed to each patient per day?

7. How often are patient's continence requirements reviewed?

8. How many pads does your provider prescribe a year, for the last full year of data that is available.

9. What is the average daily cost of a patient within the continence service?

10. Please confirm the percentage of the continence patient case load that are prescribed pads due to mobility issues rather than incontinence?

11. Do you provide products for CHC patients in nursing homes, or would this be included in their CHC package of care?

12. Could you please share any prices of products that you may have available?

13. What is the overall cost of your community continence service for the last year available? Please then split this into the amount spent on products, and the amount spent on service delivery.

For reference the 20 day deadline for this request would be **Friday 28th August 2015**.

Many thanks for your assistance.

Kind regards,
Chris Jones
